

Non-regular Faculty and Non-Regular Research Positions

1. Appointments where the individual remains employed by their home institution, but the appointment is funded by ND, can be accomplished through a Visiting Faculty or Senior Research Associate contract.
2. It is possible to establish a staff position of a limited duration, e.g. for 2 years to meet the term and needs of a research project.
3. A non-resident appointment would be unusual. Please contact the Provost Office to discuss if you have an appointment in this category. An unpaid adjunct appointment may be provided to a faculty member leaving ND for a faculty position elsewhere during a transitional period, or other very specific circumstances.
4. Appointments of Fellows of Institutes are limited to University Institutes as defined in the University Guidelines for Centers and Institutes.
5. An appointment of Externally funded postdoctoral fellow exists for providing access/privileges to postdoc fellows funded and paid directly by a third party, e.g. NSF Postdoctoral Fellowship program.
6. The Research Fellow position is a short-term, non-renewable appointment only for scholars who have completed all research for the dissertation but have yet to defend and submit and anticipate receiving their PhD degree within 12 months. Once degree is conferred it is anticipated that the scholar will move to a Postdoctoral Research Associate Appointment.
7. The Notre Dame Research Associate appointment may be used for recent Notre Dame PhD graduates whose degree was conferred within the past 90 days. Appointments are 6 months or less, unpaid, and non-renewable.
