**Postdoc Challenge: Grant Funding to Utilize CTSI-Designated Core Facilities**

SUBMISSION DEADLINE: February 22, 2019

The Indiana CTSI is soliciting proposals from postdoctoral researchers to develop translational research through the use of technologies and expertise at the Indiana CTSI-designated core facilities available at all partner institutions. Translational research refers to research in the lab that eventually translates into patient treatment to improve human healthcare. The submission deadline is February 22, 2019.
research refers to research in the lab that eventually translates into patient treatment to improve human healthcare. Translation involves applying discoveries made during research (in the lab, through animal studies, etc.) to the development of clinical trials and studies in humans.

CTSI-designated core facilities are cores that undergo a yearly accreditation process through the Indiana CTSI for all partner institutions. The Postdoc Challenge offers postdoctoral researchers at Indiana University, Indiana University School of Medicine, IUPUI, Purdue University, and the University of Notre Dame valuable proposal writing and reviewing experience in areas related to translational research through the use of one or more of the CTSI-designated core facilities at any of the partner universities. This is a competitive opportunity for a $5,000 award in the form of an expense account for use of core facility services. Funding is to be used only for services provided by the core facilities. Indiana CTSI-designated core facilities are listed on the CTSI website.

Applications to this program are limited to $5,000 and are of one (1) year duration.

If you have questions, please contact Melanie DeFord.

E-mail Signatures

Abstract: Professors express their mood by a ratio of casualness to effort in how they sign their e-mails. By paying close attention to these variations, you can learn to identify their mood and prepare accordingly.

First Initial: indicates a good mood! He/She probably spent more than 5 seconds reading your e-mail.

Three Initials: Your e-mail barely made a blip on their radar. In fact, they already forgot about it. E.g.:

“that’s fine.
-jfd”

Formal Closing Statement:
You’re pretty much screwed. Pack your bags.

jim <- j <- jfd -> J.D --> Dr.____

“Regards,
Dr.____”

First Name reserved only for a few select favorites. (#$% Golden Boy)

Dash Prefix: denotes less warmth.

Capitalized Initials express ambivalence or mild displeasure. Caution.
